

Under 4 foot 9? In a booster every time!

- An estimated 83% of children ages 4-8 ride improperly restrained in adult seat belts.
- Booster seats reduce the risk of injury and death by 59%.
- Booster seats should always be used with lap and shoulder belts.
- Never allow your child to tuck the shoulder belt under their arm or behind their back.
- Your child must pass a 5-step test in order to safely ride in an adult seat belt.
